

# Standard Measurement Guide

All Measurements should be of the day light opening of  
the garage doors

## Single and Double Garages

W= Opening Width

H= Opening Height

Our standard units accommodate an opening height up to 108". Contact us for a custom size if necessary.

## Two Door Garages

W= Total Opening Width  
(includes both doors and  
column between doors)

H= Opening Height

\*\*For two door garages only. Screen is mounted to face of house above door openings. Please check for any obstructions above and/or between the doors. If necessary relocate house numbers, lights, etc. that may interfere with the operation of the screen.
